(Resume)

I am currently an academic staff at Kotebe University of Education (KUE), Ethiopia, where the main duties are teaching, research and community service. I am also serving as an Associate Editor of Kotebe Journal of Education (KJE). Besides, I am working as a founding director of the Institute of Educational Research and Reform (IERR) at the university. Besides, I engage myself in DGC (Department Graduate Committee), RCS (Research and Community Service) and Social Relations. Prior to joining KUE, during 2009 – 2022, I contributed for Dire Dawa University in various activities and tasks. For instance, I was as instructor, organizer of “Mathematics Forum” and “Olympiad”, organizer of conferences, presenter of many Seminars, Trainer, Academic Program Officer, and Ethical Board member. Before those days, I had been a secondary school mathematics teacher (2004 -2006) and Vice Head of Education Office (2006-2007) at Dejen Woreda. Academically, I am interested in and have been working on creative imagination, ethno-mathematics, teacher education, talent development, career development, qualitative research, geometry, topology and discourse. My publications address a variety of topics. My books "Transformation Geometry" and "Preparatory Mathematics" could be mentioned as typical works. Therefore, I express myself as teacher, student, writer, trainer, coordinator, organizer, host, volunteer and leader. I am also acquiring skills needed in digital marketing, public relation and public speaking. My personal philosophies are these: (i) *my students, my friends*; (ii) my younger brother/sister/friend has to be better in progress than me. I may commit *mistakes* but not deliberately. Then, I admit, learn and compensate. I aspire to be a prominent Professor. I am interested in forming/keeping partnerships with those who would enable me exercise and develop my career profiles.
